

Physics- Electricity progression: Year 1 - Year 6

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
			identify common appliances that run on electricity		associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit
			construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers		compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches
			identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery		use recognised symbols when representing a simple circuit in a diagram
			recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit		
			recognise some common conductors and insulators, and associate metals with being good conductors
