

Year 1

Spring 2

Science

Biology - Plants

oak

Horse chestnut

conifer

willow

In this unit, we will be learning:

1. How do I plant a bean?
2. What types of plants grow in the wild?
3. What is the difference between deciduous and evergreen trees?
4. What are the parts of trees and plants called?
5. What changes occur to a tomato plant?
6. What changes have occurred to my bean plant?

Subject Specific Vocabulary

roots	Roots take in water and nutrients from the soil and keep the plant in the ground.
stem	The stem holds the plant up and carries the water and nutrients from the roots to the leaves and flowers.
leaves	Leaves catch sunlight to help the plant to make its own food.
flowers	Flowers attract insects and birds.
petals	Petals are the colourful part of the flower.
deciduous	A deciduous tree loses its leaves each year.
evergreen	An evergreen tree keeps its green leaves all year round, even in the winter.
