

Year 2

Spring 2

Science

Biology -Habitats

In this unit, we will be learning:

1. What are the characteristics of living things?
2. What is a habitat?
3. What is a microhabitat?
4. What lives in a desert habitat?
5. What lives in a rainforest habitat?
6. Can a city be a habitat?

Subject Specific Vocabulary

life processes	These are the things that all living things do. They move, breathe, sense, grow, make babies, get rid of waste and get their energy from food.
living	Things that are living have all the life processes
dead	Things that are dead were once living. They did have all the life processes but don't know.
never lived	These are things that were never living and never had life process, like metal, plastic or rock.
food chain	A food chain shows how each animal gets its food.
food sources	This is the place a living thing's food comes from
habitat	A habitat is the natural place something lives.
microhabitat	A very small habitat like under a rock or under leaves.
depend	When you need something else to survive.
survive	This means to stay alive.
