

Spring 2

Science

Biology - Adaptations

In this unit, we will be learning:

1. What is an adaptation?
2. How are organisms adapted to hot environments?
3. How are organisms adapted to cold environments?
4. What adaptations do nocturnal animals have?
5. How are organisms adapted to live underwater?
6. How are organisms adapted to live in the deep sea?

Subject Specific Vocabulary

organisms	This is another word that can be used to mean 'living things'
habitat	The specific area or place in which particular animals or plants may live.
environment	An environment contains many habitats and these include areas where there are both living and non-living things.
endangered species	A plant or animal where there are not many of their species left and scientists are concerned that the species may become extinct
extinct	When a species has no more members alive on the planet, it is extinct.
